

COBIOLUBE METAL 64

Environmentally and user-friendly synthetic water-soluble low-foaming machining fluid.

Suitable for sawing, drilling, milling, grinding and turning of ferrous and non-ferrous metals and hard plastics.

The fluid has good machining accuracy due to its excellent thermal conductivity and lubricity.

The water mixture also works in cold conditions at a higher concentration.

If necessary, the surfaces of the machined part can be cleaned with water.

Appearance yellowish

Specific gravity 1.206 kg / l

Refractometer weight% factor 1.25

Concentrate Ph 9.3

Working solution 5% -10% and above

The working fluid is translucent

No warm space is required for storage.

Thoroughly clean and disinfect the system when changing fluid.
