

COBIOLUBE METAL FOG

Environmentally and user-friendly synthetic water-soluble MQL lubricant.

Suitable for e.g. for sawing, drilling, milling and turning of ferrous and non-ferrous metals and hard plastics.

The fluid has good machining accuracy and the machining blades last a long time due to excellent lubricity.

The liquid also works in cold conditions.

If necessary, the surfaces of the machined part can be cleaned with water only.

Appearance yellowish

Viscosity 40 °C 18 cSt

Specific gravity 1.156 kg/l

Ph 9.0

No warm space is required for storage.
