

COBIOLUBE COLOUR HQ

Environmentally and user-friendly wood marking paint for forest machines.

Operating temperature -42 version: $-45\text{ }^{\circ}\text{C}$ to $\geq +40\text{ }^{\circ}\text{C}$

-30 version: $-33\text{ }^{\circ}\text{C}$ to $\geq +40\text{ }^{\circ}\text{C}$

The paint is not absorbed into the wood at all.

After marking, the color mark is waterproof and will remain visible for several years.

The amount of color required for marking is very small.

Splashes on the skin, clothing and the machine can be removed with water.

Good lubricity, wear protection and cleaning effect enable long-term uninterrupted operation of the marking system.

The color options are red, blue, green, and yellow, if necessary, you can get more color options by mixing the above colors.

The color pigments in the solution are heavy and slowly sink to the bottom of the toner tank over time, so mix the toner solution well before pouring it into the toner tank on the forest machine.
